

SYMPOSIUM

GHENT LIVER DAY (2ND EDITION)

RARE LIVER DISEASES

➤ Friday 24 March 2023 | 12:30 – 17:00 (CET)
CommunicatieCampus, Sint-Denijslaan 485, 9000 Gent

As a full member of the European Reference Network for Rare liver diseases, we are dedicating our second Ghent Liver Day to these types of diseases and conditions. European Reference Networks (ERNs) are virtual networks connecting healthcare providers across Europe. Their aim is to tackle complex or rare diseases and conditions that require highly specialized treatment, knowledge and resources and that contribute to economic aspects of health care.

We have the honour of welcoming Dr. Marcial Sebode, representative of ERN RARE LIVER, who will enlighten us on the importance of collaboration in this field. He will also update us on the treatment of autoimmune hepatitis.

A second talk will be provided by an expert in vascular liver disease, Prof. Dr. Pierre-Emmanuel Rautou from Hôpital Beaujon, France. Finally, we will bridge the gap to metabolic liver diseases with a session by our local expert, Dr. Patrick Verloo. He will explain what an gastroenterologist for adult patients should know about metabolic (often pediatric) liver disease.

We look forward to welcoming you at the second Ghent Liver Day.

Program

- 12:30 - 13:15 | **Registration and lunch**
- 13:15 | **Introduction to the European Reference Network of Rare Liver Diseases: economic impact of networking**
Dr. Marcial Sebode, ERN RARE LIVER
